

In order to fabricate a special order splint (including a combination splint) with the most accuracy, please draw the splint on the diagram below. Write down the size of each ring and other details from distal end to proximal end of the finger. Please include details such as which side of the splint you would like lateral supports on, if spacers should be filled or open and whether the spacer should be vertically or horizontally placed.

Client Name: _____ Date: _____

Therapist Name: _____ Phone: _____ Email: _____

Ulnar or Radial side of _____

A diagram of a finger splint, showing a horizontal bar with a textured section in the middle. The bar is slightly curved to follow the shape of a finger. The textured section is located in the middle of the bar, between the proximal and distal ends.

Ulnar or Radial side of _____

A diagram of a finger splint, showing a horizontal bar with a textured section in the middle. The bar is slightly curved to follow the shape of a finger. The textured section is located in the middle of the bar, between the proximal and distal ends.
